Experience

Full Stack Developer Intern

Capital Velocity LLC

August 2024 – December 2024

Las Vegas, Nevada

- Built a full-stack web application that centralizes grant and funding opportunities into a unified platform, enabling users to efficiently discover, organize, apply for, and receive personalized recommendations for relevant grants.
- Designed and implemented front end using React and Javascript, ensuring an intuitive user interface and seamless user experience.
- Built and Integrated back end APIs using Node and Express for real-time data updates and enhanced application workflows, enabling users to manage applications directly through the platform.

Software Engineer Intern

Bankhead Technologies

December 2023 - February 2024

Remote

- Contributed to a full-stack web app that streamlined sales data into a single platform for a door-to-door sales company.
- Built responsive front-end features using Svelte.js, improving user experience for field reps.
- Worked in a cross-functional team alongside designers, backend developers, and stakeholders to ensure seamless integration and alignment with business goals, resulting in improved workflow efficiency and data accessibility.

Education

University of Nevada Las Vegas

Expected Graduation: May 2025

Bachelor of Arts in Computer Science

Projects

AI Music Recommendation App | React, Node.js, OpenAI

- Built a full-stack AI-powered music recommendation web app using React, Node.js, and Supabase for user authentication and data storage.
- Integrated the OpenAI API to interpret natural language prompts and generate personalized song recommendations.
- Implemented secure user login, dynamic prompt handling, and a responsive UI for real-time, vibe-based music discovery.

Pokemon Index Web Application | Svelte.js, Tailwind.css

- Developed a Pokemon Index web application using Svelte.js, allowing users to search and view detailed information about Pokémon.
- Successfully fetched and displayed over **150** Pokemon from an external API
- Enhanced understanding of JavaScript frameworks, improving development speed

Skills

- Languages: Python, C++, HTML, CSS, JavaScript, C#, C, Java, SQL
- Technologies: Git, AWS, React, Unity, Svelte, Node, Express, API
